

THE TOP 5 REASONS TO CHOOSE The Doctor of Occupational Therapy Degree at WNE

- 1. Save Time and Tuition!** Entry-level doctoral programs in occupational therapy eliminate the need for a master's degree and are on the cutting edge of professional graduate education.
- 2. Doctoral Degree Prepares Students to Be Leaders and Scholars of the Profession** With an OTD degree, you will be equipped with the research evidence and the policy perspectives necessary to lead the movement toward a global health-care workforce.
- 3. Small Class Sizes Mean Individualized Attention and Support.** With a maximum cohort of 35 and a typical faculty-to-student ratio of 1:8 in clinical labs you'll receive individualized attention.
- 4. Numerous Hands-on Experiential Opportunities That Are Intentionally Integrated** The expanded doctoral curriculum includes coursework with integrated Level I Fieldwork, 24 weeks of Level II Fieldwork, and a 14-week doctoral experiential residency.
- 5. Four Performance Laboratory Settings to Mirror "Real-world" Experience** Our three clinical laboratories and off-campus Health and Wellness House are specifically designed to provide applied learning opportunities in realistic environments.
