## — HELMETS —

**We ALL want to make it home at night, construction workers are NO exception**

Our smart helmet is a cutting-edge safety device that monitors real-time hazards on construction sites to protect workers and enhance compliance.

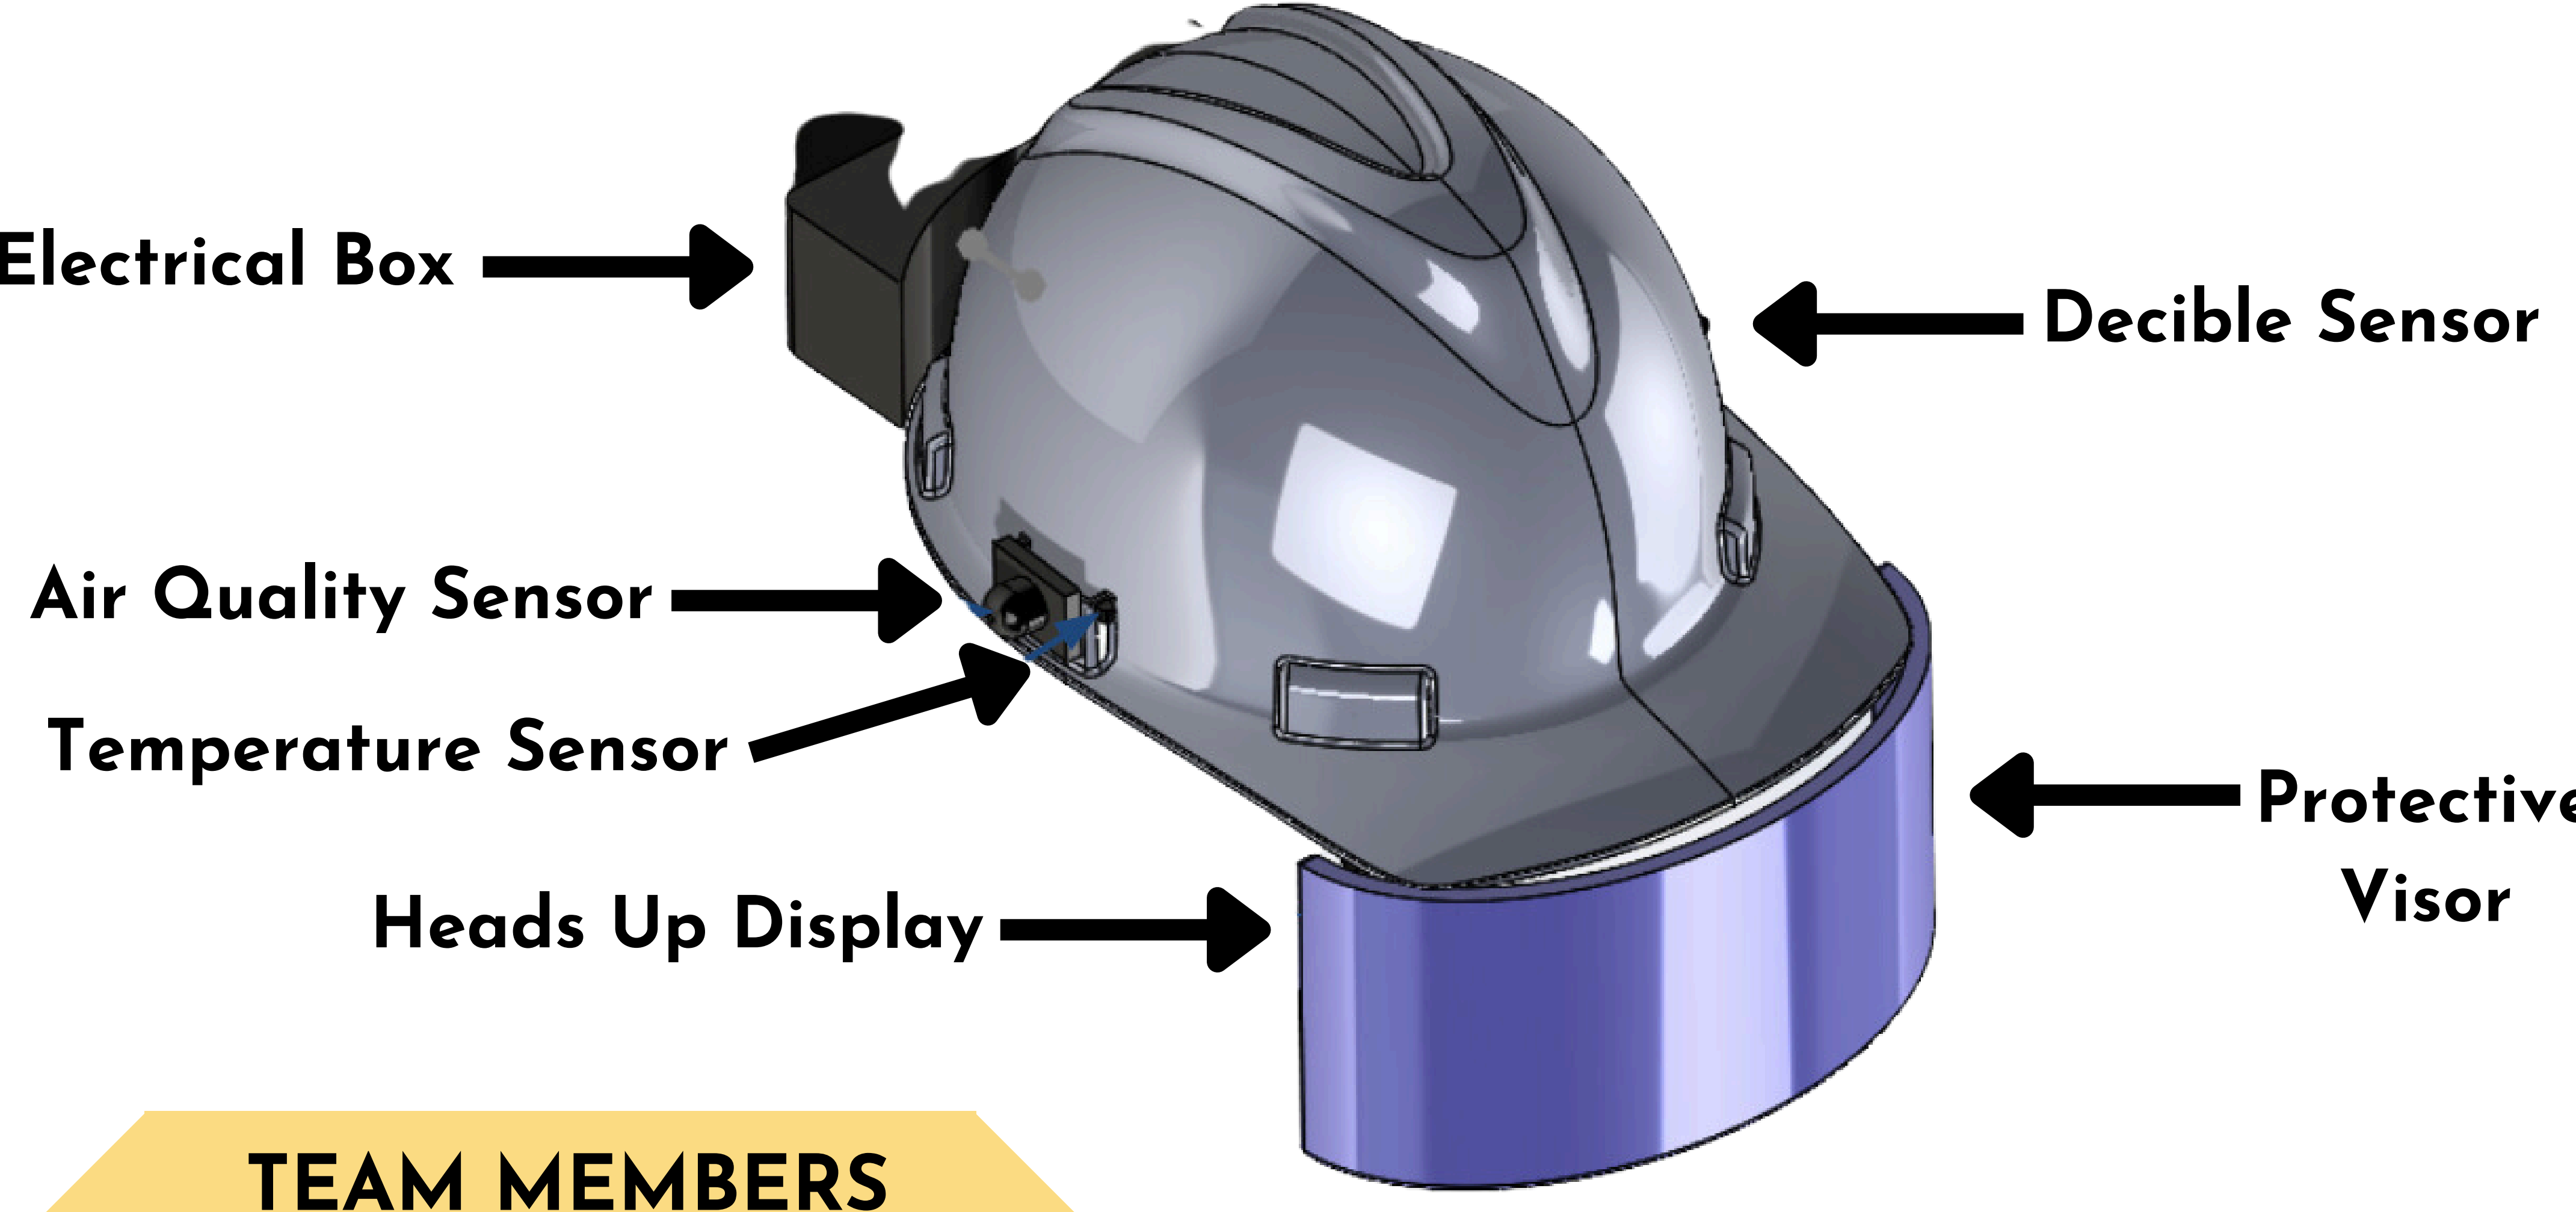

- Immediate alerts: Noise, Temperature, Air Quality
- Non-intrusive design: No disruption to work
- Accident prevention: Reduces injury
- Liability reduction: Minimizes legal concerns
- Worker-focused: Comfortable & Practical

Feature	Function	Benefit
Air Quality, Temperature, and Decibel Sensors	Read real time working condition data	Keeps workers safe on the site
OLED Display	Alerts workers if the ambient conditions violate the OSHA and AQI standards	Shows workers exactly what condition is unsafe and allows them to adapt and fix their environment for improved safety.
Stored database of data collected by sensors	Holds data collected by sensors in order for managers to access and help their employees gain better working conditions	Managers can keep track of their employees working conditions and see that their sites are safe
Built-In visor	Protect worker's eyes from debris on site	Added safety feature of the base helmet

**Sales in Year 3**  
**\$2,924,854**

**MSRP**  
**\$199.99**
